Claim Objections

Claims 7 and 8 are objected to because of the following informalities:

Art Unit: 1625

In claims 7 and 8 , a table (reflections vs. the specified lattice spacings) and a table (reflections vs. the relative intensities) are written. However, they are improper in the claims. Therefore, an appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated clearly by Takada et al (U.S. 4,965,151).

Takada et al discloses a multimetal oxide $Ag_xV_2O_{5-y}$, where x is between 0.6 and 0.8 and y is 0 and 5 .(see col. 3 ,lines 10-11). Furthermore, according to its crystal morphology, the claimed compound has inherently the claimed properties, such as X-ray diffraction pattern and specific surface area, and etc. This is identical with the claims.
